About The Science Center

The University City Science Center accelerates technology commercialization, regional economic development, and the market availability of life-enhancing scientific breakthroughs by bringing together innovations, scientists, entrepreneurs, funding, laboratory facilities, and business services. Established in 1963 and headquartered in Philadelphia, PA, the Science Center was the first, and remains the largest, urban research park in the United States. It provides services that range from incubator space with fully-equipped laboratories and "plug 'n play" offices for entrepreneurs to path-breaking programs designed to demonstrate, nurture, and sustain new technology businesses and bring their benefits to the region and the world. For more information about the Science Center, visit www.sciencecenter.org.
